ezRoom

More control in the classroom with ezRoom

ezRoom

ezRoom provides incredible classroom audio and connects devices into a single system.

ezRoom streamlines communication and automates technology for a simple, user-friendly experience. Schools can connect projectors, displays, speakers, and other smart devices to ezRoom and control them using a single wall panel.

ezRoom also provides classroom soundfield so students can hear the teacher and don't miss out on learning. The teacher's voice is amplified by the microphone to overcome background noise and ensure students can hear the critical speech sounds they need to learn.

Other Features

Digital feedback suppression

Integrated HDMI with audio extraction

Voice activated control

Voice activated lesson capture

LED array status indicator

Expandable for more speakers

Integrated Bluetooth® receiver

Key Benefits

Incredible classroom audio

ezRoom amplifies audio and the teacher's voice to improve student comprehension, engagement, and participation.

Better AV Control

ezRoom consolidates all your AV device controls. Control displays, switch media sources - even raise or lower shades - from our wall panels, computer and mobile apps, or voice commands.

Build an eco system

Use your existing network to connect with Conductor and have bells, announcements, intercom, and emergency alerts go through classroom speakers.

Built for your needs

Each ezRoom system is built to suit your school's needs. We provide a range of design and technology options to suit every learning environment.

Lesson Capture

Easily record lessons and video from displays with lesson capture. Once ezRoom is finished recording, automatically name and upload lessons to the web.

ALD Compatible

With our Hearing Inclusion Kit, ezRoom connects to assistive listening devices to support teachers and students with hearing impairments to engage in classroom education.
